Message

Please give me the facts: I hear that NC doesn't need another pipeline... plenty of natural gas already and it is just a ploy to make more money/overkill. I have seen what ecological disasters happen in other parts of the nation and the world when pipelines break... and I am still appalled by the force against Native Americans in the Dakotas. I hear that the poor, who have fewer resources to fight will suffer with this going on their land. Then I see the Atlantic Coast Pipeline commercials which try to guilt trip us to think we are not supporting the economy/jobs it will create in the Coastal Plain. What is the truth? Please answer. Thank you.
